

# LOCAL CONTENT ENHANCING INITIATIVES IN MINERALS EXPORTING COUNTRIES

Jane Korinek  
Economist and Trade Policy Analyst, OECD

IGF Annual General meeting  
Session on Local Content Policies in the Mining Sector  
Geneva, October 16-20, 2017

# OECD: Who we are

The OECD is an international, inter-governmental organisation based in Paris with 35 member countries that provides independent analysis, regulatory instruments and a forum for policy dialogue and coordination of public policies

OECD countries promote policies that will improve the economic and social well-being of people around the world

*through co-operation*

sharing information and ideas that work

*mutual advice and peer review*

# OECD study: 10 minerals-rich countries

---

## Development of local capacity: aims and objectives

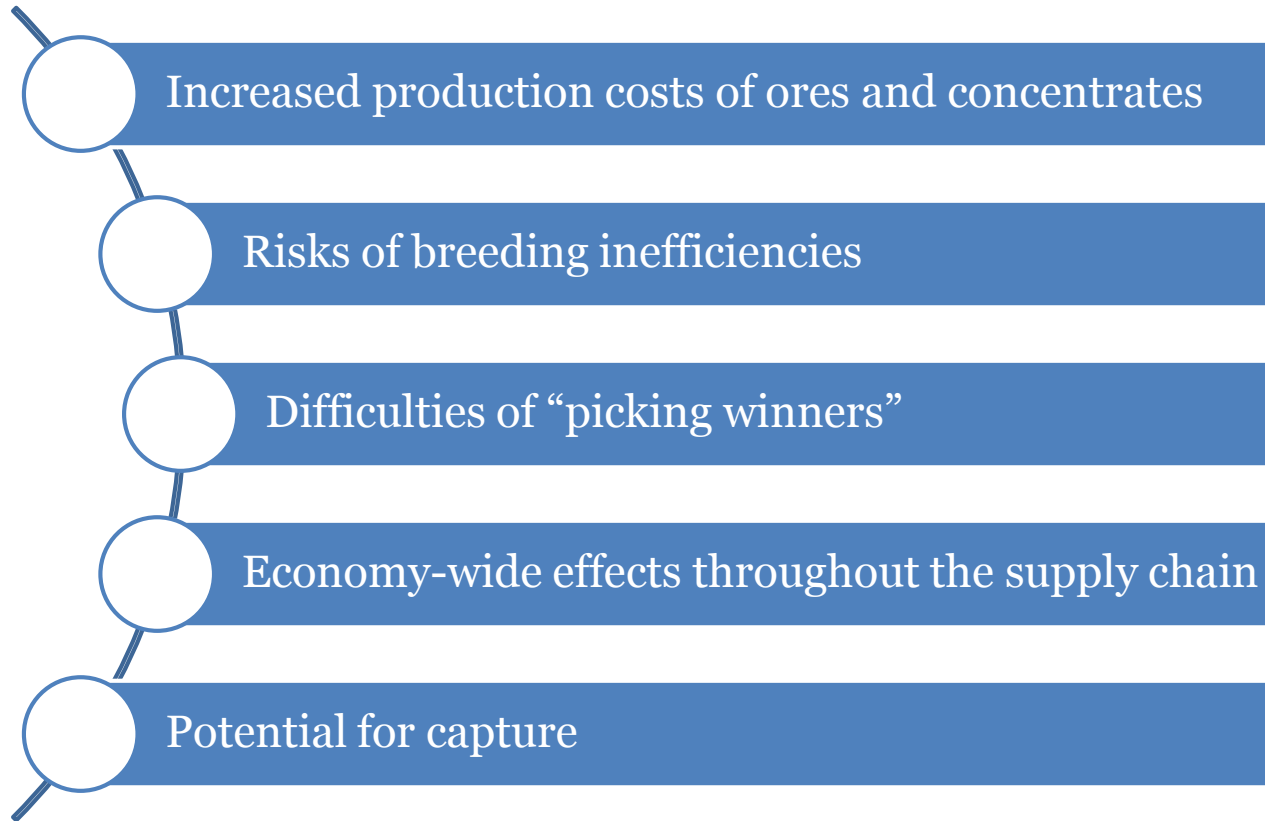

---

- Development of upstream supply chains
- Workforce development
- Transfer of technology
- Research and development and innovation

# Some countries impose mandatory, quantitative targets but there are risks

---

# Some countries require engagement and prioritize monitoring and reporting

Australia: no targets but reporting on measures taken to procure or hire locally

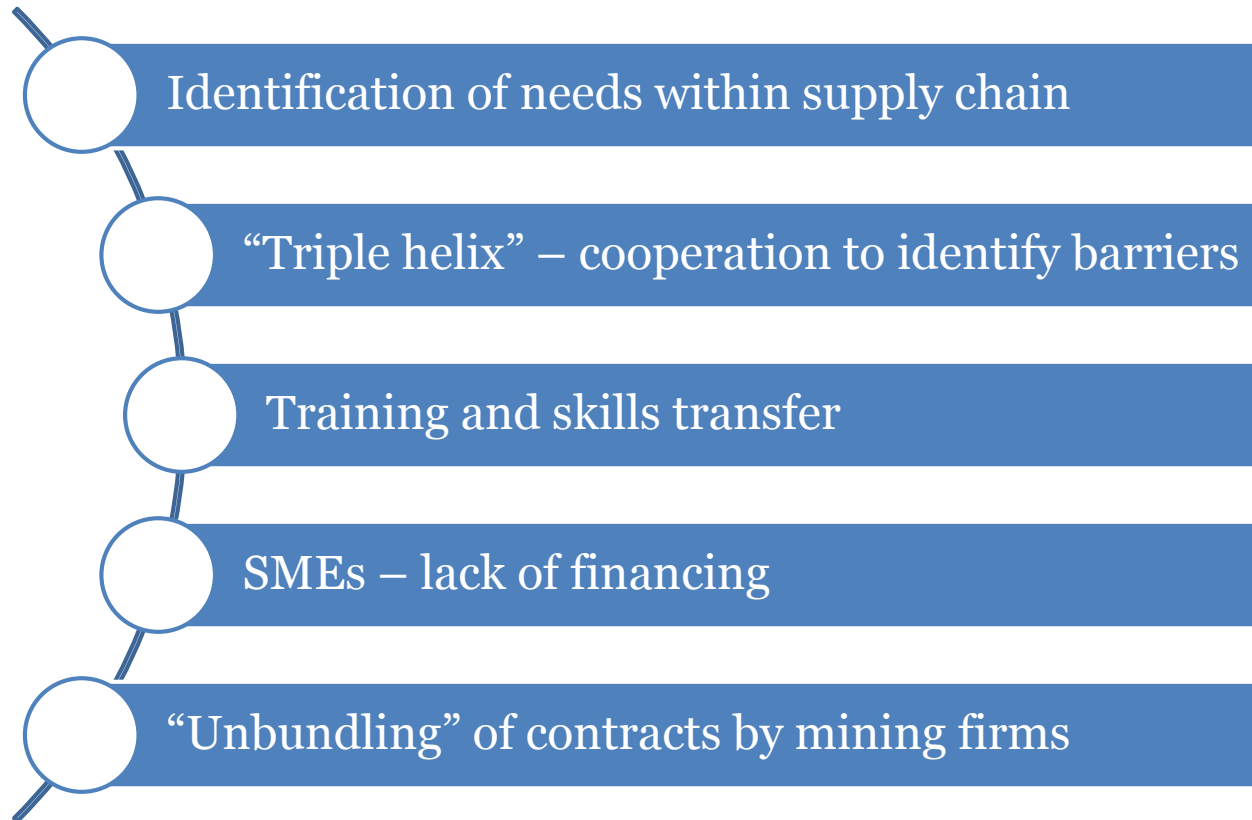

Canada: no specific measures imposed but firms must engage with local communities through their Obligation to Consult; Impact and Benefit agreements outline impacts on local communities

# Different ways in which countries support local suppliers

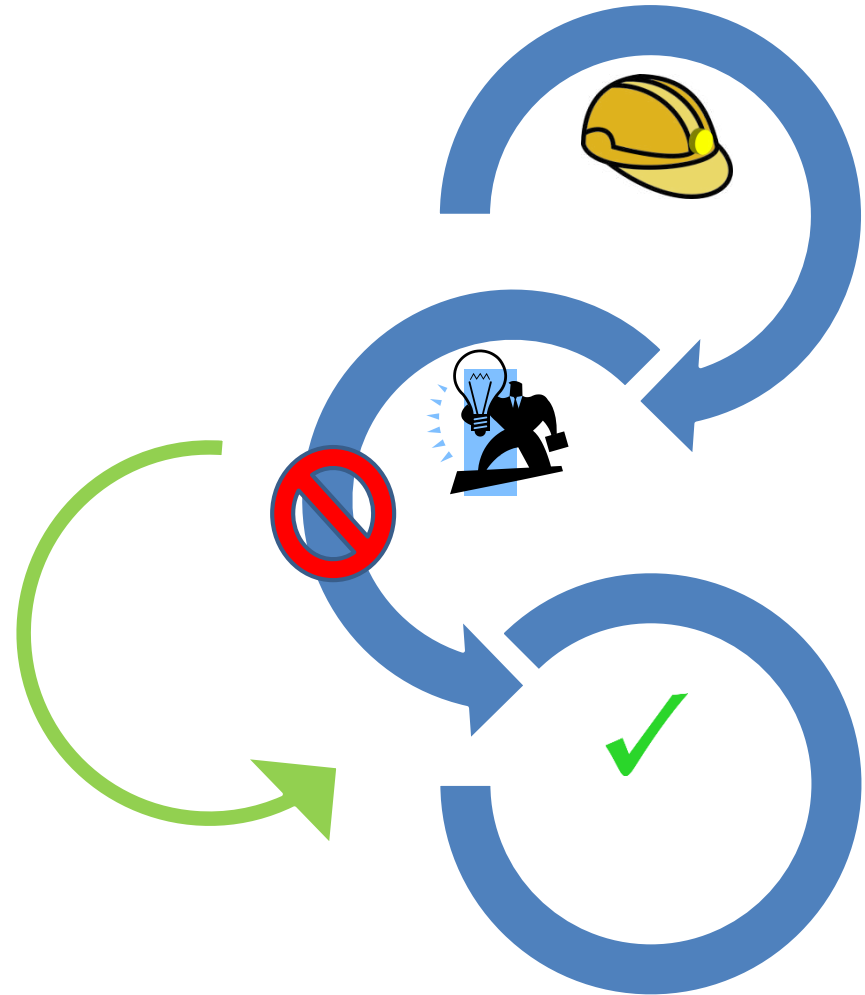

---

# Mining firms: enabling local suppliers

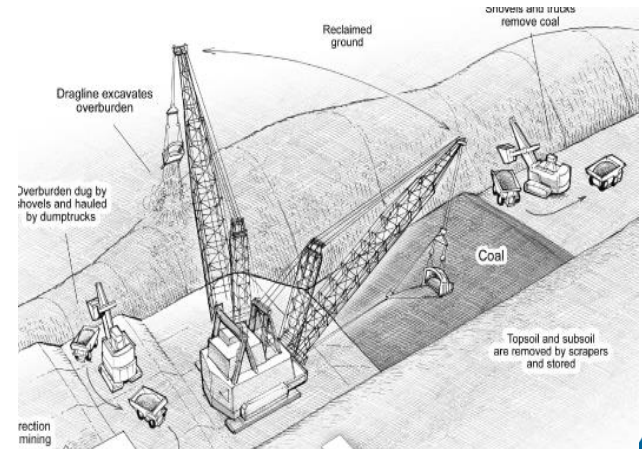

Targeting a specific point in the procurement process where local firms have fallen short of full competitiveness: e.g., the tendering process in Australia

# Public-private training centres: Canada

# Suppliers development programmes

# Mining for inclusive growth
