

# WOMEN AND THE MINE OF THE FUTURE

Preliminary analysis of ILO mining employment data by sex in 2020

The Women and the Mine of the Future project aims to support better understanding of the gendered employment profile of large-scale mining and its supply chain. The data shown here is part of the project's baseline analysis of gender-segregated data for 11 countries to help stakeholders anticipate and manage future challenges and opportunities for women in the evolving mining sector.

## NATIONAL EMPLOYMENT ALL INDUSTRIES

■ Proportion of Working Age Population  
■ Proportion of Employed Population

In 2020 the Brazilian national workforce consisted of 57% male and 43% female employees. The working age population was 47% male and 53% female.

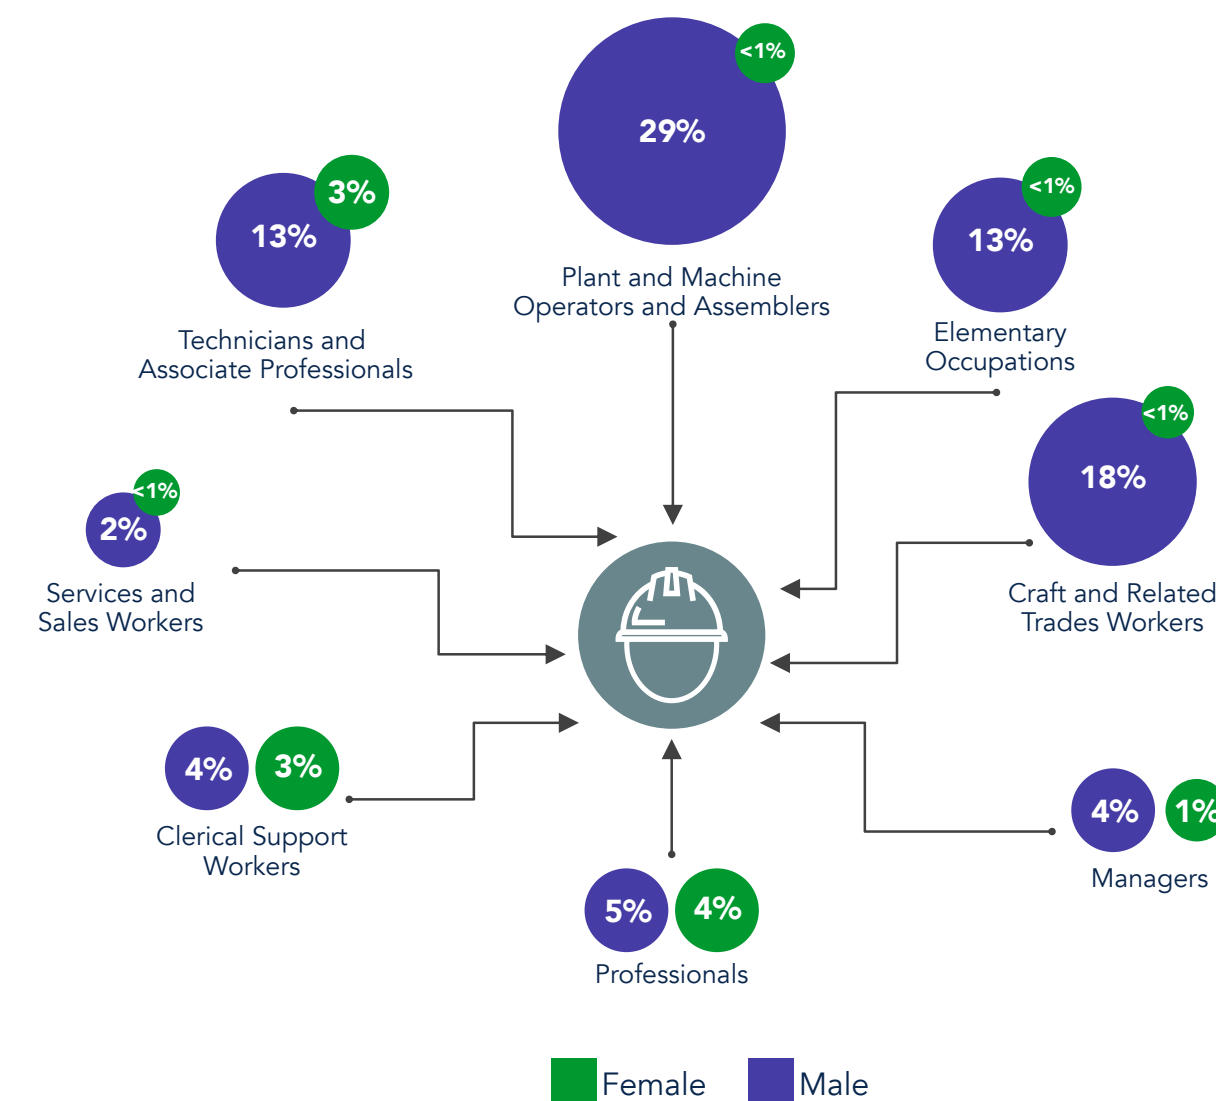

## PROPORTION OF EMPLOYED POPULATION IN MINING AND ESTIMATED PARTICIPATION RATES OF MALE AND FEMALE WORKERS

■ Female ■ Male

Mining and quarrying accounted for 0.5% of occupations in Brazil in 2020. ILO estimates the participation rate for female employees in mining category was 12% in 2020.

## MINING OCCUPATIONS AS A PROPORTION OF TOTAL MINING WORKFORCE
